

POST CEMENTATION INSTRUCTIONS

DON'T EAT ANYTHING FOR AN HOUR. ALL FLUIDS ARE FINE. AVOID CHEWING ON SIDE WITH PROSTHESIS (crown or bridge) FOR 24 HOURS. IT IS NECESSARY TO ALLOW THIS TIME FOR THE CEMENT TO SET. IF THE PROSTHESIS FEELS HIGH OR YOU FEEL YOU ARE HITTING IT FIRST, IT IS IMPERATIVE THAT YOU COME IN TO ADJUST IT. IF YOUR TEETH ARE NOT HITTING EVENLY, ROOT CANAL THERAPY MAY RESULT FROM THE OVERLOAD IN ONE AREA.
